CONSIGNES DE SÉCURITÉ

e Afin d'utiliser correctement ce produit, veuillez lire attentivement ce manuel.

e Si vous avez des questions concernant l'utilisation, veuillez contacter votre distributeur local ou l'agen. (La tension nominale de ce produit est de 220 V. Veuillez vérifier avant d'utiliser le produit.)

e Afin d'améliorer les performances, les spécifications des produits peuvent être modifiées sans préavis.

Pour votre sécurité et celle des autres, et pour éviter les blessures et les pertes inutiles, veuillez suivre les conseils ci-dessous pour utiliser correctement ce produit.

Vous avertir de la manière d'éviter les dommages corporels.

NOTE

Indique que des aions doivent être suivies ou évitées pour éviter d'endommager l'équipement ou d'autres éléments. Les signes de contenu à observer sont décrits ci-dessous :

	It is forbidden to disassemble, repair or modify the product by yourself, otherwise
	Ne pas vaporiser d'eau ou de détergent sur le corps du produit ou sur la fiche d'alimentation. Cause du shod' électrique ou du dysfonctionnement
@	Do not pull the power plug with wet hands, you may get an electric shock
	Vérifiez que la source d'eau est propre et que la pression de l'eau est conforme aux normes en vigueur.
 !NOTE	<p>4. Ce produit est un produit électrique, ne le placez pas dans un endroit exposé à l'eau pendant une longue période.</p> <p>2. Veuillez utiliser une prise de courant supérieure à 800W</p> <p>3. Assurez-vous que la prise de courant du produit est 220V / HHz. La prise de courant of the product must be grounded.</p> <p>4 La batterie de la télécommande utilise 2 piles sèches 1.SV.</p> <p>5. Si le cordon d'alimentation est endommagé, il doit être remplacé par un cordon spécial ou des accessoires spéciaux achetés auprès de l'organisation de fabrication ou du service d'entretien d'B.</p> <p>6. Veuillez utiliser les accessoires et les tuyaux d'eau fournis avec ce produit.</p>

SAFETY PRECAUTIONS

In order for you to use it correctly and avoid danger or damage, please be sure to observe the following!

 Prohibited matters
  Must do

 Prohibited use
  No wet hands

 No open flames
  Prohibition of disassembly

 No water
  Connect the ground wire

 Must be implemented

Notes for icons in this column!

 No wet hands

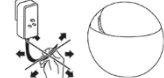

Do not touch the power outlet and plug with wet hands!
Touching with wet hands may cause electric shock!

 Forbidden

It is forbidden to use the damaged power socket or power plug, and contact the customer service center immediately if the component is damaged.

 Risk of electric shock, short circuit, and fire!

 No open flames

Do not allow naked flames (cigarettes, etc.) to approach the bidet!

 Easy to cause fire!

 No water

Do not allow the bidet to get wet or wet!

 May cause fire or electric shock

 Connect the ground wire

Use a socket with a ground terminal, may be! may cause a malfunction or electric shock.

 For ungrounded sockets, be sure to entrust a designated electrical service company to take grounding measures before use.

 When purchasing a socket separately, be sure to purchase a grounded socket.

 Forbidden

Please do not plug more than one socket Plug for electronics!

 Avoid overheating of the socket.

 Avoid using unclean or wet power outlets.

 Make sure that the power plug is in good contact with the socket.

 Forbidden

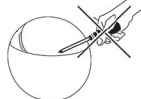

Never use industrial or reclaimed water!

 To prevent skin damage!

 Prohibition of reconnection

 May cause fire or electric shock

 Must be implemented

If there is a strange smell or abnormal noise, unplug the power plug immediately!

 Unplug the power plug immediately!

 Please contact customer service center in time!

PRÉCAUTIONS DE SÉCURITÉ

Une apparence n'est donnée qu'à titre indicatif.

Forbid

Please note low temperature burns.

- Even if the temperature is not high, low temperature burns may occur if you touch the same position on the toilet seat for a long time.
- Please pay attention to the following people: infants, the elderly, patients, involuntary behavior Powerful, drunk, overfired.
- Seek medical attention if a low-temperature burn occurs.

Forbid

Do not step on the toilet or place heavy objects!

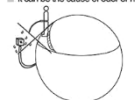

- Strong impact can cause malfunctions. Do not sit or step on the body or control panel to avoid damage or personal injury.
- Children are not easy to play with.

Must be implemented

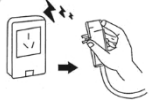

Avoid contaminating the nozzle with excrement!

- It can be the cause of odor or malfunction.

Must be implemented

Unplug the power plug during a lightning storm!

Must be implemented

Do not open and close the lid violently!

- Cause failure.

Note

Do not lean on the lid and control panel!

- It may cause failure and damage.

NOTE

- Ne pas utiliser d'eau de banane, d'essence, de médicaments, de nettoyeurs ou de pesticides pour nettoyer ce produit.
 - Il est conseillé aux groupes de personnes suivants de faire attention aux fesses à basse température : les jeunes enfants, les personnes âgées, les patients, les personnes incapables de s'aider elles-mêmes, les personnes ayant des capacités, les personnes prenant des médicaments contenant des substances somnifères, les personnes ivres, les personnes surchargées de travail.
 - Lorsqu'il s'agit d'un projet de loi, On et non pas d'un projet de loi, On est un projet de loi qui a pour but d'améliorer la qualité de la vie.
- afin d'éviter l'assèchement du tube chauffant et le dysfonctionnement de la combustion à sec.

(Remarque : les toilettes intelligentes ci-dessus ne représentent qu'une forme parmi d'autres ; c'est le produit réel qui prévaut).

MODE D'EMPLOI

Note : Lors de la première utilisation, si la télécommande ne répond pas, le mode doit être adapté.
(Press and hold the hip cleaning button while the toilet is turned on, and then operate any button on the remote control with a single click to successfully match the code)

Power/stop

Clic! cette touche permet d'arrêter la fonction en cours, et une pression longue permet de l'activer ou de la désactiver.

Ouvrir le siège nng

Appuyez sur le bouton de retournement de la télécommande et le couvercle se retournera automatiquement.

Réglage de la force de la tige de pulvérisation

In the power-on state, first press the power button on the remote control to shut down, and then operate the spray bar forward and backward keys on the remote control within 3 seconds after the cover is closed. At this time, the first operation is to light up the screen (move forward to increase the force, move back to decrease the force, and there are 14 gears adjustable respectively). Observe the digital display on the screen and adjust it. After adjusting and operating the remote control, press and hold the power button on the remote control to start up.

Hanches/move/séchage

After the human body is seated, press the operation "hip washing" or press the "hip moving" button on the remote control to wash the hips the nozzle will automatically stop spraying after two minutes at the fixed position, or press the stop button on the remote control to stop operation, and then press warm air drying and automatic flushing once at the same time. Après l'activation de la fonction de nettoyage des fesses, appuyez à nouveau sur le bouton de nettoyage des fesses.

the working state of. After washing for two minutes, press the heating function again, or get up to automatically stop the heating function, or press the remote control press the "drying" button on the toilet, the toilet will be heated and dried, and the heating and drying will automatically stop after 3 minutes. Wash at hips during the process, press the "Forward" or "Backward" button on the remote control to adjust the position to move forward when the mobile round-trip cleaning function is not used or adjust the position of hip cleaning nozzle backward. After the cleaning function is activated, press the "switch" or the "switch" button on the remote control, the toilet will stop all functions being performed.

Lavage de Women/mobile

After the human body is seated, press the "women washing mode" or the "women washing/moving" button on the

deplacement. cleaning effect. If you press the button again the mouth will stop moving back and forth and stay in the working state before Appuyez sur la touche supérieure de la télécommande pour ajuster le bouton smàon "Forward" ou "Badward" afin de

régler la vitesse de rotation de l'appareil.

nozzle. After the washing function is started, press the "On" button on the remote control, and the toilet will stop all the functions being performed.

Drying

After the human body is seated, press the drying button on the remote control to enter the warm air for drying and automatically flush the water.

Rinçage/arrêt

If this function is idle, press the "flush" button on the remote control to start the toilet flush function. In case of AC power failure, press and hold the knob to stop the button for about 3 seconds to perform the toilet flushing function. At this time, the standby is used. The electric energy of the battery, so this state must be guaranteed to operate when the battery is charged. The backup battery uses 9V battery pack. The number of times of use is related to the capacity of the battery used. The larger the capacity, the more times of use. The backup battery only stops when the AC power is off. For emergency use of electricity, it is not recommended to use this method all the time.

Température de l'eau

This key is the water temperature adjustment key. Four-stage adjustment of water temperature and temperature: non-lighting is normal temperature / blue light is low temperature (about 34 ° C) / purple light is medium temperature (about 37 ° C) / red light is high temperature (about 40 ° C) four-stage cycle adjustment, Adjust it to your liking.

Température du siège

This key is the seat temperature adjustment key. Four-stage adjustment of seat temperature and temperature: normal temperature without lights / low temperature (about 30 ° C) with blue lights / medium temperature (about 35 ° C) with purple lights and high temperature (about 40 ° C) with red lights, You can adjust it to your liking.

Ajustement de la position

Within 3s of shutdown, press the flip button to enter the state of adjusting the microwave distance (the range is displayed at the water temperature), the range is 1-5, the first range is the closest, and the fifth range is the furthest. The power button stops the adjustment. The detection range of the first gear is greater than 0.8 meters, the second gear is 1 meter, the third gear is 1.2 meters, the fourth gear is 1.5 meters, and the fifth gear is 1.8 meters. The third gear is the default.

Veilleuse

Lorsqu'une personne n'est pas assise, la touche de fonction l'night light permet d'allumer ou d'éteindre l'éclairage.

clearing pattern. Press and hold
to turn the machine on/off.

PRODUCT INSTALLATION

Construction Points and Names of Departments

The picture is shown in Figure 1. This picture shows the main components and construction points in the construction.

figure 1

1.Preparation before installation

User-supplied tools: adjustable wrench, woodworking spirit level, Phillips screwdriver, glass glue gun, glass glue, glass tape, raw material tape, tape measure, right angle ruler, electric drill, drill bit

2.Installation steps

Mark the center line of the drain on the ground, and install the water inlet angle valve at a suitable position on the wall according to the size of the toilet.

- Install the water inlet angle valve (see Figure 1)
 - Construction and installation instructions (see Figure 2, Figure 3, and Figure 4)
1. Align the wall with the centerline of the drain pipe (there are two options: 305mm and 400mm).
 2. Draw the position of the center hole (select the installation hole according to the actual needs).
 3. Gently turn the toilet sideways, and press the side of the accessory seal ring with mud to the sewage drain at the bottom of the toilet.
 4. Align the toilet drain outlet with the vertical position of the drain outlet.

figure 2

figure 3

figure 4

● Installing toilet

Tips 1:

1. The newly-renovated house is liable to damage the machine and affect human health due to residual debris such as mud and sand in the pipeline. Before installing, drain off the dirty water in the pipeline.
2. Please choose a professional installer to install this product. After installation, please carefully check whether each part is installed correctly. After 48 hours, the glass glue is completely cured before use.

Tips 2:

After connecting the water pipe to open the angle valve, if there is water flowing from the nozzle in the new product, please plug it in and it will automatically reset the nozzle and stop the water. Be sure to turn off the power and water before disassembling.

1. In the event of a power failure during the cleaning process, please do not move the spray boom. After a call, the function returns to normal after a self-test.
2. Be sure to use the special water inlet angle valve and other accessories provided by our company.

Caveat:

1. Smart toilet accessories have been debugged before leaving the factory, and unauthorized disassembly is strictly prohibited. Please use the fittings and pipes provided by our company. Old fittings and pipes cannot be reused. If you have any questions, please contact your local dealer or our after-sales service department.
2. All contents in this instruction manual are based on the latest situation of the product at the time of printing. Subject to change without notice.

CLEANING ANGLE VALVE

Turn off the angle valve switch, use a slotted screwdriver or coin tool to unscrew the back cover switch, remove the filter and clean
